

March 2024 Facilities Report

- Energy Efficiency
 - Earthlight Technologies and Stafford Mechanical have provided energy upgrade proposals. Cost savings are negligible and ROI almost non-existent. Requested they resubmit with new lighting only in effort to realize an investment of cost savings.
 - Unfortunately, the proposal is more upgrades than cost savings.
- Painting
 - Various paint projects ongoing
- Fire Alarm - On March 20, a smoke detector was activated. The Woodstock Fire Department(s) responded. No damage or injuries occurred. We must look to educate the congregation of the safety protocols in these events in regards to immediate evacuation of the building and safe distancing from the facility as first responders arrive.
- Steeple Windows
 - All four steeple windows have been replaced (repurposing much of the window glass) Total cost of project. \$5,797.48. We will provide an opportunity for angel donations.
- Parsonage
 - Church well location under review by agencies
 - Well drilling target sometime in April
- Palladium Window
 - Marvin Windows replaced the center window sash and balance tubes under warranty - Bottom center window was found to be bowed. Marvin will replace it under warranty. - no activity
- Spring Cleaning Day - Sunday, April 29, immediately following worship service.
 - Sign ups have begun
 - Tasks list created
- Kitchen Freezer is running at higher temperatures. Not suitable for long term storage of perishable items. Unlikely this unit can be repaired we are looking for replacement.
